3,481 For persons with primary diagnosis, Medicaid only	13%

Emergency Department admissions with primary MH/DD/SA diagnoses 2 nd quarter FY 2014	
34,419 of 942,715 total ED admissions	3.7%
Average wait times in emergency departments for state hospital admission 2 nd quarter FY 2014	
90.4 Hours	3.77 Days
Number of readmits to emergency departments within 30 days in 2 nd quarter FY 2014**	
598 of 4,752 total Medicaid ED admits under MCO Waiver	13%

Initiative Start Date = December 2013

For all measures, improvement will be reflected by a decrease over time.

* More complete data for FY 2013 is available now than was available at original publication. Further analysis resulted in a discovery that approximately 9% of the total ED visits had missing diagnoses. Excluding those visits would actually make this percentage higher (148,820/4,116,487 visits = 3.6%). The FY 2014 first quarter data has been analyzed and is reported using this improved methodology - excluding visits with missing diagnosis information.

** This measure has been "caught up" and now reflects the same quarter as the other two measures.
